SUMMMER INTERNSHIP AT SATVIFY

Name – Janvi Jaiswal

Rollno- 2410030535

Program- B.tech CSE

Batch- 2024-2028

Organization Profile – Satvify

- **Company Overview:** Satvify is an innovative health-tech startup that originated right here on our campus through a university incubation initiative.
- **Core Mission:** Driven by the vision of promoting conscious living, Satvify offers accessible, health-focused solutions centered around a pure vegan and satvic lifestyle.
- **Industry Domain:** E-Commerce & Web-Based Applications.
- **My Role:** Frontend Developer Intern, responsible for translating core product goals into intuitive, user-centric web interfaces.

Project

Background & Problem Statement

The Project: Building a dedicated, high-converting Subscription Page for Satvify's platform.

Key Challenges Addressed:

- **Information Architecture:** Presenting multi-tiered satvic plans (such as custom meal plans vs. product boxes) without overwhelming the user visually.
- **Cross-Device Consistency:** Eliminating layout bugs to ensure an flawless experience across mobile, tablet, and desktop viewports.
- **Dynamic Interactivity:** Eliminating sluggish full-page reloads when users toggle between monthly and annual billing cycles.

Objectives & Scope

- **Primary Objectives:**
 - Engineer a modern, production-ready pricing interface using semantic HTML5, custom CSS3, and modern Vanilla JavaScript (ES6+).
 - Build an adaptive grid layout using modern CSS tools like Flexbox and CSS Grid.
 - Implement instant client-side calculation to highlight annual savings and active plan choices.
- **Project Scope:** Focused entirely on client-side engineering, user experience (UI/UX) optimization, and dynamic DOM manipulation.

Technical Stack & Tools

- **Core Web Technologies:**
 - **HTML5:** Used to build clean, accessible, and semantically structured web components.
 - **CSS3:** Leveraged for custom brand styling, smooth visual transitions, layout responsiveness, and @media queries.
 - **JavaScript (ES6+):** Utilized to drive client-side interaction, manage state changes, and update DOM elements in real-time.
- **Development Suite:** Visual Studio Code (IDE), Git & GitHub (Version Control), and Chrome DevTools (Responsive Debugging & UI Inspection).

Internship Experience & Learning Outcomes

- **Technical Growth:** Gained hands-on proficiency in responsive layout architecture, modular event handling, and cross-browser testing.
- **Professional Growth:** Experienced working within an early-stage startup environment, collaborating directly with founders, and incorporating user feedback rapidly.
- **Current Status:** The internship is actively ongoing, with early project milestones successfully delivered.

SUMMARY

In summary, this project successfully bridged frontend engineering with Satvify's core vision of promoting a conscious, satvic lifestyle. By designing and developing an interactive, highly responsive subscription portal, we created a seamless entry point for users to explore and commit to health-focused living. The project deepened my technical expertise in HTML5, custom CSS layout design, and dynamic DOM manipulation with JavaScript, while giving me invaluable hands-on experience in a fast-paced, startup incubation environment

THANKYOU!
